White Rubber Coated Fiberglass Tadpole Tape (Tacky Cloth) with Rope Core

550°F / 287°C: Tuff-Flex™ TadpoleTape™ High Temperature *With or Without Wire Insert*

TadpoleTape™ made from Tuff-Flex™ 550 tacky cloth.

This is a widely used tadpole tape that provides a resilient and non-absorbent gasket material for service against steam, air, water and gases.

Especially useful where a rough or uneven surface or flange exists. The fabric is a fiberglass base with a special white rubber formulation. The fabric is tacky, and has a plastic film surface covering that is removed before installation. The fabric will stick to itself once the film is removed.

Wire Inserted Version: The fill (width wise) yarn for this version of the fabric has a twisted brass wired formed with it, providing additional strength and electrical conductivity/shielding.

550°F / 287°C continuous rating, excellent sealing properties as a gasket material

Tuff-Flex™ TadpoleTape™ High Temperature White Rubber Coated Fiberglass Tacky Cloth with Rope Core: with or without wire insert

Part Number	Over All Width in / mm	Price per Foot By Bulb Size: A / B / C / D / E in / mm				
		"A" 3/8" / .375 / 7.9	"B" ½" / .500 / 13	"C" 5/8" / .625 / 15.8	"D" ¾" / .750 / 19	"E" 1" / 1.000 / 25

TT-FG-TC-M063-40-X-Z	2.50 / 63	$ 7.56	$ 7.84	$ 8.36	$ 9.64	$ 12.84
TT-FG-TC-M076-48-X-Z	3.00 / 76	$ 8.56	$ 8.92	$ 9.40	$ 10.76	$ 14.44

For the "X" value in the part number specify either A, B, C, D, or E to correspond to the bulb size

For the "Z" value in the part number use "W" to specify with wire insert
use "N" to specify no wire

Same price with and without wire insert

Standard Rolls of 25 and 50 feet. For By-The-Foot pricing: add 25% to price shown.

Curing: It is recommended that this material be cured in situ. This material must be heated to a minimum of 300°F within 60 minutes, then it must sit at 300°F or higher for 90 minutes for the rubber to fully cure.

Do not overtorque the material during this curing time or the rubber will be squeezed off of the base material.

If the material is not fully cured, the rubber will drip from the material causing voids. After curing the material can be exposed to a lower operational temperature.
